## PROFILE

Senior Data Engineer with hands-on experience designing and operating enterprise-scale data platforms, batch and streaming pipelines, and cloud-native data architectures. Strong software engineering background in Python and Java, enabling the development of reliable, maintainable, and production-grade data systems.

## EMPLOYMENT HISTORY

### Senior Data Engineer

Dec 2024 – Present

Agile Actors, Athens, Greece

- Designing and maintaining enterprise-scale data warehouse and lakehouse solutions supporting banking analytics.
- Contributed to the migration of a banking analytics project from Azure Synapse Analytics to Azure Databricks, including migration planning, implementation, production rollout, and stakeholder coordination.
- Collaborated with business stakeholders, architects, and project leadership to gather requirements, coordinate deliverables, and support successful project execution.
- Implemented data quality and reconciliation processes to ensure consistency between legacy and modern platforms during migration.
- Documented datasets, tables, and metadata using Unity Catalog, improving data governance and discoverability.
- Contributing to the design and implementation of a new enterprise data mart, including dimensional data modelling and ETL development for downstream banking systems.
- Serving as Technical Coach for three engineers, conducting technical evaluations, mentoring, and supporting their technical growth.
- **Technologies:** Python, SQL, Apache Spark, Azure Databricks, Delta Lake, Unity Catalog, Azure Synapse Analytics, Azure Data Factory, Azure DevOps, PostgreSQL, Microsoft SQL Server.

### Data Engineer

Feb 2024 – Dec 2024

Agile Actors, Athens, Greece

- Designed, developed, and operated production-grade ETL/ELT pipelines and CI/CD workflows.
- Implemented secure and reliable data ingestion pipelines from external FTP sources into Delta Lake and relational databases.
- Developed and maintained data warehouse solutions supporting enterprise banking analytics.
- Performed data modelling and ETL development for analytical workloads.
- **Technologies:** Python, SQL, T-SQL, Apache Spark, Apache Airflow, Azure Databricks, Azure Synapse Analytics, Azure Data Factory, Azure DevOps, PostgreSQL, Microsoft SQL Server, IBM AS/400, IBM Db2.

### Software Engineer

May 2023 – Jan 2024

Viaboxx GmbH, Bonn, Germany

- Full stack software engineer (backend-focused) for a Bike Parking Facility project.
- Contributed to backend services and APIs supporting web, mobile (Android/iOS), and Electron-based client applications.
- **Technologies:** Kotlin, Python, Java, TypeScript, SQL, Spring Boot, Vue.js, Ionic Angular, PostgreSQL, GraphQL, REST API, Docker, Terraform.

## Big Data Engineer

Agile Actors, Athens, Greece

Apr 2022 – Apr 2023

- Designed and implemented scalable batch and streaming data pipelines for real-time and scheduled workloads.
- Led cloud migration initiatives, including migrating from Hadoop to Databricks and transitioning from Apache Kafka to Azure Event Hub.
- Enhanced DataOps workflows to improve data reliability and pipeline automation.
- Developed APIs and monitoring solutions to expose pipeline metrics and data quality indicators.
- Extended a reusable ETL framework built on Apache Airflow, improving standardization, reliability, and developer productivity.
- **Technologies:** Python, Scala, Java, SQL, Apache Airflow, Apache Spark, Azure Databricks, Delta Lake, Azure Data Lake, Apache Hadoop, Azure Blob Storage, Grafana, Azure Pipelines, Azure AKS, Azure Key Vault, Azure Event Hub, Azure DevOps, Docker, Kubernetes, Flask API.

## Software Engineer

Netcompany-Intrasoft, Athens, Greece

Feb 2020 – Apr 2022

- Developed and maintained external services that integrate with the Perseus core product.
- Contributed to the core product development, handling specific tasks to enhance system functionality.
- Contributed to backend development for Bahrain, Uganda, and Rwanda deployments.
- Implemented and optimized backend services, ensuring high performance and scalability.
- Collaborated with cross-functional teams to customize and deploy Perseus based on the specific requirements of each country.
- **Technologies:** Apache Maven, Java, JavaEE, Oracle Database, Oracle Weblogic Server, Wildfly, Jax-RS, Hibernate, JPA, AWS (EC2, S3), Jaspersoft Studio, JSF, Apache Kafka, jBPM, Apache Camel, Primefaces, Git, Docker.

## EDUCATION

### MSc in Computer Science

Department of Informatics and Telecommunications, University of Athens

Oct 2019 – Sep 2025

- Specialization: Data, Information and Knowledge Management Grade: 9.03/10 (Excellence)
- Thesis Topic: *Serverless and Distributed Implementation of a Multilayer Perceptron*
- Thesis Link: [pergamos.lib.uoa.gr/item/uoadl:5311364](https://pergamos.lib.uoa.gr/item/uoadl:5311364)

### BSc in Computer Science

Department of Informatics and Telecommunications, University of Athens

Oct 2014 – Sep 2018

- Focus: IT Foundations and Data Management Grade: 7.61/10

### High School

Evangeliki Lyceum, Athens

Sep 2011 – Jun 2014

- Final Grade: Excellent (19.2/20)

## CERTIFICATIONS & COURSES

- Free Data Engineering Bootcamp – DataExpert.io (Jan 2025)
- E-Learning: Web Development – University of Athens (9.12 ECVET, Sep 2019 – Jun 2020)

## LANGUAGES

---

- English: ECPE Proficiency (C2) – University of Michigan (May 2011)
- German: Goethe Zertifikat B2 (May 2016)

## SEMINARS

---

- React Seminar – Coding School (Feb – Mar 2021): Certificate
- Global AI Bootcamp – Microsoft Hellas (Dec 2019)

## TECHNICAL SKILLS

---

- **Programming:** Python, Scala, Java, Kotlin, SQL, C, C++, JavaScript, HTML/CSS, Solidity, Bash, Prolog, Haskell
- **Data Engineering & Big Data:** Apache Spark, Apache Airflow, Kafka, Databricks, Delta Lake, Data Warehousing, Data Lakes, Batch & Streaming Processing
- **Cloud & DevOps:** Microsoft Azure, Amazon Web Services, Docker, Kubernetes, Terraform, CI/CD
- **Databases:** PostgreSQL, SQL Server, Oracle, MongoDB, Redis, Cassandra, Neo4j, IBM Db2, MySQL
- **Frameworks:** Spring Boot, Flask, Node.js, React, Vue, Ionic Angular, JSF, Hibernate, JPA
- **AI/ML:** TensorFlow, Keras, PyTorch, scikit-learn
- **OS:** Windows 7/10/11, macOS, Ubuntu, Xubuntu

## SOFT SKILLS

---

- Effective Communication, Multi-tasking, Time and Priority Management
- Analytical Thinking, Organizational Skills, Team Spirit

## MILITARY SERVICE

---

**Electronic Warfare Media Operator**

*Nov 2018 – Aug 2019*

## LICENSES

---

- Driving License – Category B (Dec 2014)

## ACTIVITIES & HOBBIES

---

- Basketball, Volleyball (Panhellenic: 4th in 2010, 3rd in 2013, 1st in 2014)
- Ping Pong, Swimming, Chess
